CANADIAN JOURNAL OF MICROBIOLOGY, VOLUME 13

AUTHOR INDEX

Under each name are listed, in chronological order of publication, all articles in which an author has participated.

Adams, G. A.
D-*glycero*-D-*manno*-Heptose as a component of lipopolysaccharides from Gram-negative bacteria. G. A. Adams, C. Quadling, and M. B. Perry, 1605.
Agnihotri, V. P.
The influence of nitrogenous compounds on growth of *Pythium* species. V. P. Agnihotri and O. Vaartaja, 1509.
Alexander, M.
Phenols as intermediates in the decomposition of phenoxyacetates by an *Arthrobacter* species. M. A. Loos, R. N. Roberts, and M. Alexander, 679.
Formation of 2,4-dichlorophenol and 2,4-dichloroanisole from 2,4-dichlorophenoxyacetate by *Arthrobacter* sp. M. A. Loos, R. N. Roberts, and M. Alexander, 691.
The effect of antimetabolites on nodulation and growth of leguminous plants. J. A. E. Molina and M. Alexander, 819.
Al-Hassan, K. K.
The effect of nutrients and environment on synnemata formation of *Stilbella thermophila*. K. K. Al-Hassan and C. L. Fergus, 351.
Allam, M. E.
The carbon and nitrogen nutrition of certain fungi. H. M. Yusef and M. E. Allam, 1097.
Altenbern, R. A.
Genetic studies of pigmentation of *Staphylococcus aureus*. R. A. Altenbern, 389.
Amarger, N.
Polysaccharides extracellulaires de *Rhizobium meliloti*. N. Amarger, M. Obaton et H. Blachère, 99.
Armstrong, R. E.
Further studies on the kinetic serum-neutralization (McBride) test for polioviruses. J. Furesz and R. E. Armstrong, 1223.
Aubé, C.
Antagonisme des champignons du sol envers *Verticillium albo-atrum* R. et B., agent de la flétrissure verticillienne de la luzerne. C. Aubé, 227.
Austin, K. E.
Assay of relative heterotrophic potential in the sea: the use of specifically labelled glucose. R. D. Hamilton and K. E. Austin, 1165.
Baldwin, J. N.
Factors affecting the selection of chromogenic variants of *Staphylococcus aureus*. J. T. Parisi and J. N. Baldwin, 110.
Nature of the determinant of tetracycline resistance in *Staphylococcus aureus*. S. S. Kasatiya and J. N. Baldwin, 1079.
Barua, M.
Rhizobial relationship of the genus *Phaseolus*. I. Cross-inoculation performance of different species to *R. phaseoli*, *R. japonicum*, and the cowpea organism. M. Barua and P. N. Bhaduri, 910.
Behki, R. M.
Production of radioactive myxin. S. M. Lesley, R. M. Behki, and D. C. Gillespie, 1251.
Bell, E. J.
Rickettsia canada: a new member of the typhus group or rickettsiae isolated from *Haemaphysalis leporispalustris* ticks in Canada. J. A. McKiel, E. J. Bell, and D. B. Lackman, 503.
Berk, R. S.
The extracellular protease from *Pseudomonas aeruginosa* exhibiting elastase activity. G. G. Johnson, J. M. Morris, and R. S. Berk, 711.
Best, G. K.
Time-lapse cinematography of vancomycin-treated microbial cells. N. N. Durham, E. C. Noller, M. W. Burger, and G. K. Best, 417.
Bhaduri, P. N.
Rhizobial relationship of the genus *Phaseolus*. I. Cross-inoculation performance of different species to *R. phaseoli*, *R. japonicum*, and the cowpea organism. M. Barua and P. N. Bhaduri, 910.
Bhattacharjee, J. K.
A glucose EMB agar method for detection of respiratory deficiency in yeast. J. K. Bhattacharjee, 1116.

Bianchi, D. E.
The effect of oxygen tension on growth, conidiation, and alcohol production of *Neurospora crassa*. M. J. Kobr, D. E. Bianchi, N. Oulevey, and G. Turian, 805.
Bigland, C. H.
Salmonella essen and Arizona 12:27–28 isolations from Saskatchewan garter snakes. C. H. Bigland and G. A. Fox, 1049.
Bills, D. D.
Acetone in milk cultures of lactic streptococci and *Leuconostoc citrovorum*. T. W. Keenan, D. D. Bills, and R. C. Lindsay, 1118.
Bird, F. T.
A virus disease of the European red mite *Panonychus ulmi* (Koch). F. T. Bird, 1131.
Blachère, H.
Polysaccharides extracellulaires de *Rhizobium meliloti*. N. Amarger, M. Obaton et H. Blachère, 99.
Blackwood, A. C.
Pellicle formation and ester production by *Hansenula anomala*. C. Mills and A. C. Blackwood, 1259.
Blakley, E. R.
The metabolism of phenylacetic acid by a *Pseudomonas*. E. R. Blakley, W. Kurz, H. Halvorsen, and F. J. Simpson, 147.
The microbial production and some characteristics of δ-carboxymethyl-α-hydroxymuconic semialdehyde. E. R. Blakley, H. Halvorson, and W. Kurz, 159.
The metabolism of aromatic compounds with different side chains by a *Pseudomonas*. E. R. Blakley, 761.
Blumenthal, B. I.
Distribution of heat-labile and heat-stable inorganic pyrophosphatases among some bacteria. B. I. Blumenthal, M. K. Johnson, and E. J. Johnson, 1695.
Bodily, H. L.
Nuclease activity of streptococci. R. F. Smith and H. L. Bodily, 1295.
Boleyn, B. J.
A simple pipette control for isolating planktonic algae. B. J. Boleyn, 1129.
Boyd, W. L.
L-Serine dehydratase (deaminase) of psychrophiles and mesophiles from polar and temperate habitats. J. T. Staley and W. L. Boyd, 1333.
Bradley, S. G.
Temperature-sensitive replication of an actinophage for *Streptomyces aureofaciens*. S. Kuroda and S. G. Bradley, 1569.
Bretz, H. W.
Resistance to actinomycin D of *Escherichia coli* after frozen storage. H. W. Bretz and F. E. Kocka, 914.
Brewer, D.
The growth of *Bacillus subtilis* in media containing chetomin, sporidesmin, and gliotoxin. D. Brewer, D. E. Hannah, R. Rahman, and A. Taylor, 1451.
The biological properties of 3,6-epithiadiketopiperazines. Degradation of gliotoxin-B by *Bacillus subtilis* (HLX 373). D. Brewer and A. Taylor, 1577.
Browder, H. P.
Lytic action of lysostaphin on susceptible and resistant strains of *Staphylococcus aureus*. W. A. Zygmunt, H. P. Browder, and P. A. Tavormina, 845.
Brown, E. R.
Certain physical and chemical properties of two murine leukemia viruses. E. R. Brown, P. Buinauskas, and S. O. Schwartz, 957.
Brown, L. R.
Carbohydrate metabolism in *Hydrogenomonas eutropha*. D. W. Cook, R. G. Tischer, and L. R. Brown, 701.
Buinauskas, P.
Certain physical and chemical properties of two murine leukemia viruses. E. R. Brown, P. Buinauskas, and S. O. Schwartz, 957.
Burger, M. W.
Time-lapse cinematography of vancomycin-treated microbial cells. N. N. Durham, E. C. Noller, M. W. Burger, and G. K. Best, 417.
Burke, C. M. W.
Toxicity of copper to *Escherichia coli* in relation to incubation temperature and method of sterilization of media. C. M. W. Burke and I. McVeigh, 1299.
Butler, T. F.
Bacterial cell membranes. I. Reaggregation of membrane subunits from *Micrococcus lysodeikticus*. T. F. Butler, G. L. Smith, and E. A. Grula, 1471.
Bacterial cell membranes. II. Possible structure of the basal membrane continuum of *Micrococcus lysodeikticus*. E. A. Grula, T. F. Butler, R. D. King, and G. L. Smith, 1499.

Caird, J. D.
The nature of staphylococcal beta hemolysin. I. Mode of action. G. M. Wiseman and J. D. Caird, 369.
Campbell, J. B.
Isolation of a series of Mengo virus variants differing in sensitivity to polyanions. J. B. Campbell and J. S. Colter, 651.
Sensitivity to, and production of interferon by three variants of Mengo virus. J. B. Campbell and J. S. Colter, 931.
Campbell, J. N.
Sulfur isotope fractionation by *Salmonella* species. H. R. Krouse, R. G. L. McCready, S. A. Husain, and J. N. Campbell, 21.
Campbell, N. E. R.
The produciton of $^{13}N_2$ by 50-MeV protons for use in biological nitrogen fixation. N. E. R. Campbell, R. Dular, H. Lees, and K. G. Standing, 587.
Carlberg, G.
A comment on the nutritional grouping of soil bacteria. V. Sundman and G. Carlberg, 565.
Carlucci, A. F.
Bioassay of seawater. IV. The determination of dissolved biotin in seawater using ^{14}C uptake by cells of *Amphidinium carteri*. A. F. Carlucci and S. B. Silbernagel, 979.
Carpenter, J. A.
Bacteriophage studies of isolates from fire blight sources. A. T. Hendry, J. A. Carpenter, and E. H. Garrard, 1357.
Carroll, B. J.
Effects of sulfa drugs on spore germination, vegetative growth, and toxin formation of *Clostridium botulinum* type E. B. Q. Ward and B. J. Carroll, 107.
Production of toxin by *Clostridium botulinum* type E in defined media. B. Q. Ward and B. J. Carroll, 108.
Carson, J. H.
The induction of birefringence in pellicles of bacterial cellulose from *Acetobacter xylinum* by lipids. J. H. Carson, L. C. Sowden, and J. R. Colvin, 837.
Casida, L. E., Jr.
Occurrence and enumeration of *Bdellovibrio bacteriovorus* in soil capable of parasitizing *Escherichia coli* and indigenous soil bacteria. D. A. Klein and L. E. Casida, Jr., 1235.
Escherichia coli die-out from normal soil as related to nutrient availability and the indigenous microflora. D. A. Klein and L. E. Casida, Jr., 1461.
Casselton, P. J.
Influence of the nitrogen source on the adenine reversal of 3-amino-1,2,4-triazole inhibition of *Prototheca zopfii* growth. P. J. Casselton, 1564.
Chacko, C. I.
Accumulation of DDT and Dieldrin by microorganisms. C. I. Chacko and J. L. Lockwood, 1123.
Chagnon, A.
A note on the effect of different pH values on polyoma virus. M. Clode-Hyde and A. Chagnon, 246.
Chan, E. C. S.
Development of a method for the total count of marine bacteria on algae. E. C. S. Chan and E. A. McManus, 295.
Chet, I.
Chemical composition of hyphal and sclerotial walls of *Sclerotium rolfsii* Sacc. I. Chet, Y. Henis, and R. Mitchell, 137.
Chhonkar, P. K.
Phosphate solubilizations by fungi associated with legume root nodules. P. K. Chhonkar and N. S. Subba-Rao, 749.
Chung, K. L.
Autoradiographic studies of bacterial cell wall replication. I. Cell wall growth of *Bacillus cereus* in the presence of chloramphenicol. K. L. Chung, 341.
Ciegler, A.
Aflatoxin G_1 uptake by cells of *Flavobacterium aurantiacum*. E. G. Lillehoj, A. Ciegler, and H. H. Hall, 629.
Clark, A. M.
Synchronous production of conidiophores and conidia of *Neurospora crassa*. G. J. Stine and A. M. Clark, 447.
Clark, D. S.
Comparison of pour and surface plate methods for determination of bacterial counts. D. S. Clark, 1409.
Clode-Hyde, M.
A note on the effect of different pH values on polyoma virus. M. Clode-Hyde and A. Chagnon, 246.

Cobet, A. B.
Marine thiobacilli. I. Isolation and distribution. R. C. Tilton, A. B. Cobet, and G. E. Jones, 1521.
Cole, S. E.
Serological comparisons between strains of *Agrobacterium tumefaciens*. R. M. Hochster and S. E. Cole, 569.
Collins, R. P.
Keto acids produced by *Chlamydomonas reinhardti*. R. P. Collins and K. Kalnins, 995.
Colter, J. S.
Isolation of a series of Mengo virus variants differing in sensitivity to polyanions, J. B. Campbell and J. S. Colter, 651.
Sensitivity to, and production of interferon by three variants of Mengo virus. J. B. Campbell and J. S. Colter, 931.
Colvin, J. R.
The induction of birefringence in pellicles of bacterial cellulose from *Acetobacter xylinum* by lipids. J. H. Carson, L. C. Sowden, and J. R. Colvin, 837.
Colwell, R. R.
The taxonomy of enterococci. R. R. Colwell, M. Mandel, and H. Raj, 917.
Cook, D. W.
Carbohydrate metabolism in *Hydrogenomonas eutropha*. D. W. Cook, R. G. Tischer, and L. R. Brown, 701.
Cooke, P. M.
An antiviral substance from *Penicillium cyaneo-fulvum* Biourge. III. Studies on the nature of the antiviral substance. D. Syeklocha, P. M. Cooke, and J. W. Stevenson, 1481.
Corpe, W. A.
Chemical composition of cell envelopes from *Agrobacterium tumefaciens*. R. J. Manasse and W. A. Corpe, 1591.
Cropp, C. B.
Therapeutic activity of lysostaphin in experimental staphylococcal infections. E. F. Harrison and C. B. Cropp, 93.
Crowden, R. K.
Biosynthesis of the polyphenolic acid metabolites of *Polyporus tumulosus* Cooke. R. K. Crowden, 181.
Cserjesi, A. J.
The adaptation of fungi to pentachlorophenol and its biodegradation. A. J. Cserjesi, 1243.
Curl, E. A.
Effect of atrazine on growth response of *Sclerotium rolfsii* and *Trichoderma viride*. R. Rodriguez-Kabana, E. A. Curl, and H. H. Funderburk, Jr., 1343.
Daft, G. C.
Population variations of epiphytic bacteria. C. Leben and G. C. Daft, 1151.
Darbyshire, J. F.
Protozoa and bacteria in the rhizosphere of *Sinapis alba* L., *Trifolium repens* L., and *Lolium perenne* L. J. F. Darbyshire and M. P. Greaves, 1057.
Davis, E. A.
Phosphorylation coupled to the oxidation of sulfite and 2-mercaptoethanol in extracts of *Thiobacillus thioparus*. E. A. Davis and E. J. Johnson, 873.
Demain, A. L.
Ribonuclease as an antimicrobial agent. A. L. Demain, 1109.
de Repentigny, J.
Emploi d'analogues de l'adénine dans l'étude de la spécificité de l'inhibition par cette purine de la croissance de la souche Wood 46 de *Staphylococcus aureus*. J. de Repentigny, C. Labelle et S. Sonea, 919.
Dhala, S. A.
Occurrence and nature of spirilla around Bombay. S. V. Kushe and S. A. Dhala, 907.
Di Franco, E.
Effet de l'inoculation subséquente du virus SV_{40} sur la transplantation de cellules transformées par ce virus. R. Dubreuil, E. Di Franco, V. Pavilanis et P. Marois, 543.
Tumeurs à virus SV 40: réduction des récidives tumorales post-opératoires chez le hamster par l'administration du virus; résistance à une seconde transplantation. R. Dubreuil, E. Di Franco, V. Pavilanis et P. Marois, 1433.
Dima, V. F.
Modifications enzymatiques et morphologiques chez *Brucella suis* traitée par l'interféron. V. F. Dima, A. Petrovici, J. Szabados, Th. Vasilesco, A. Pop et K. Rudesco, 721.
Din, G. A.
Carbon dioxide fixation and phosphoenolpyruvate carboxylase in *Ferrobacillus ferrooxidans*. G. A. Din, I. Suzuki, and H. Lees, 1413.

Doetsch, R. N.
Reversible "paralysis" of the flagella of certain Gram-negative bacteria. P. L. Schuetze and R. N. Doetsch, 1114.
Donaldson, J.
Resistance to actinomycin D in *Lactobacillus casei*. J. Donaldson and A. J. Moriarity, 113.
Dondero, N. C.
The predominant bacteria in natural zoogloeal colonies. I. Isolation and identification. R. F. Unz and N. C. Dondero, 1671.
The predominant bacteria in natural zoogloeal colonies. II. Physiology and nutrition. R. F. Unz and N. C. Dondero, 1683.
Doyle, R. J.
The influence of some hexitols and sugars on CO_2 production by starved and X-irradiated starved yeast cells. E. Spoerl and R. J. Doyle, 811.
Dubreuil, R.
Effet de l'inoculation subséquente du virus SV_{40} sur la transplantation de cellules transformées par ce virus. R. Dubreuil, E. Di Franco, V. Pavilanis et P. Marois, 543.
Tumeurs à virus SV 40: réduction des récidives tumorales post-opératoires chez le hamster par l'administration du virus; résistance à une seconde transplantation. R. Dubreuil, E. Di Franco, V. Pavilanis et P. Marois, 1433.
Dular, R.
The production of $^{13}N_2$ by 50-MeV protons for use in biological nitrogen fixation. N. E. R. Campbell, R. Dular, H. Lees, and K. G. Standing, 587.
Dumasia, M. D.
The induction of lambda prophages by controlled desiccation. S. J. Webb and M. D. Dumasia, 33.
Bound water, inositol, and the induction of lambda prophages by ultraviolet light. S. J. Webb and M. D. Dumasia, 303.
Duncan, D. W.
Role of *Thiobacillus ferrooxidans* in the oxidation of sulfide minerals. D. W. Duncan, J. Landesman, and C. C. Walden, 397.
Durham, N. N.
Time-lapse cinematography of vancomycin-treated microbial cells. N. N. Durham, E. C. Noller, M. W. Burger, and G. K. Best, 417.
Elkan, G. H.
Correlation of physiological characteristics with nodulating ability in *Rhizobium japonicum*. D. H. Hubbell and G. H. Elkan, 235.
Some effects of medium composition and metabolic intermediates on biotin inhibition in a strain of *Rhizobium japonicum*. G. H. Elkan, 533.
Elliott, S. C.
Lactic dehydrogenase studies in animals infected with type 12 streptococci or treated with streptococcal nephrotoxin. S. C. Elliott and C. K. Williamson, 1027.
Emmatty, D. A.
The role of nutrients and pH in reversing fungistasis of conidia of *Trichoderma viride*. D. A. Emmatty and R. J. Green, Jr., 635.
Eveleigh, D. E.
The determination of β-1,3-glucanase: anomalous reduction of alkaline 3,5-dinitrosalicylate. D. E. Eveleigh, 727.
"Protoplasts" from *Pythium* sp. PRL 2142. J. H. Sietsma, D. E. Eveleigh, R. H. Haskins, and J. F. T. Spencer, 1701.
Evelyn, T. P. T.
The metabolism of putrescine (1,4-diaminobutane) by mycobacteria isolated from fish. I. Preliminary studies with intact cells. T. P. T. Evelyn, 511.
The metabolism of putrescine (1,4-diaminobutane) by mycobacteria isolated from fish. II. Studies with arsenite-inhibited cells and cell-free extracts. T. P. T. Evelyn, 521.
Ewing, W. H.
The deoxyribonuclease test as applied to certain gram-negative bacteria. W. J. Martin and W. H. Ewing, 616.
Fergus, C. L.
The effect of nutrients and environment on synnemata formation of *Stilbella thermophila*. K. K. Al-Hassan and C. L. Fergus, 351.
Fishel, C. W.
Biopolymeric associations in bacterial subcellular fractions. E. E. Woodside, C. A. Frick, and C. W. Fishel, 1641.
Fitzgerald, J. W.
The effect of some cultural conditions on the arylsulfatase of *Proteus rettgeri*. F. H. Milazzo and J. W. Fitzgerald, 659.

Fitz-James, P. C.
The structure of phialides in *Penicillium claviforme*. K. Zachariah and P. C. Fitz-James, 249.
Flanagan, A.
Growth of marine bacteria on some organic acids and its application to the selective isolation of pseudomonads. G. Moskovits and A. Flanagan, 1561.
Flemming, C.
A proteolytic pseudomonad from skin lesions of rainbow trout (*Salmo gairdnerii*). I. Characteristics of the pathogenic effects and the extracellular proteinase. M. F. Li and C. Flemming, 405.
Fox, G. A.
Salmonella essen and Arizona 12:27–28 isolations from Saskatchewan garter snakes. C. H. Bigland and G. A. Fox, 1049.
Fredette, V.
Effect of hyperbaric oxygen upon anaerobic streptococci. V. Fredette, 423.
Frick, C. A.
Biopolymeric associations in bacterial subcellular fractions. E. E. Woodside, C. A. Frick, and C. W. Fishel, 1641.
Funderburk, H. H., Jr.
Effect of atrazine on growth response of *Sclerotium rolfsii* and *Trichoderma viride*. R. Rodriguez-Kabana, E. A. Curl, and H. H. Funderburk, Jr., 1343.
Furesz, J.
A rapid micro tissue culture assay in BS-C-1 cells for the titration and neutralization of measles virus. P. Moreau and J. Furesz, 313.
Further studies on the kinetic serum-neutralization (McBride) test for polioviruses. J. Furesz and R. E. Armstrong, 1223.
Gandhi, S. S.
Variation in sensitivity of an interferon assay system. R. B. Stewart and S. S. Gandhi, 1421.
Garber, E. D.
Virulence and cellulolytic activity of *Colletotrichum lagenarium*. C. E. Henry and E. D. Garber, 618.
Garcia-Acha, I.
Vacuoles of fungal protoplasts. I. Garcia-Acha, F. López-Belmonte, and J. R. Villanueva, 433.
Garrard, E. H.
Bacteriophage studies of isolates from fire blight sources. A. T. Hendry, J. A. Carpenter, and E. H. Garrard, 1357.
Garraway, M. O.
Ethanol-induced accumulation of a pentose in *Armillaria mellea*. M. O. Garraway and A. R. Weinhold, 1705.
Gibbins, L. N.
The preparation of antigens of *Rhizobium meliloti* by ultrasonic disruption: an anomaly. L. N. Gibbins, 1375.
Gibbons, N. E.
The lysis of a psychrophilic marine bacterium as studied by microelectrophoresis. J. R. Madeley, R. R. Korngold, D. J. Kushner, and N. E. Gibbons, 45.
Gilardi, G. L.
Characteristics of *Alcaligenes odorans* var. *viridans* isolated from human sources. G. L. Gilardi, 895.
Gillespie, D. C.
Production of radioactive myxin. S. M. Lesley, R. M. Behki, and D. C. Gillespie, 1251.
Gledhill, W. E.
Glycopeptide synthesis during sporulation of *Bacillus megaterium*. W. E. Gledhill, 1615.
Goldschmidt, E. P.
Differences in toxicity of EDAT + Tris among mating types of *Escherichia coli*. M. C. Goldschmidt, E. P. Goldschmidt, and O. Wyss, 1401.
Goldschmidt, M. C.
Differences in toxicity of EDTA + Tris among mating types of *Escherichia coli*. M. C. Goldschmidt, E. P. Goldschmidt, and O. Wyss, 1401.
Goodfellow, M.
Numerical taxonomy of some named bacterial cultures. M. Goodfellow, 1365.
Gray, J.
Influence of nafcillin on the enzymic lysis of *Staphylococcus aureus*. G. H. Warren and J. Gray, 321.

Greaves, M. P.
Protozoa and bacteria in the rhizosphere of *Sinapis alba* L., *Trifolium repens* L., and *Lolium perenne* L. J. F. Darbyshire and M. P. Greaves, 1057.
Grecz, N.
Effect of temperature on radiation resistance of spores of *Clostridium botulinum* 33A. N. Grecz, J. Upadhyay, and T. C. Tang, 287.
Green, R. J., Jr.
The role of nutrients and pH in reversing fungistasis of conidia of *Trichoderma viride*. D. A. Emmatty and R. J. Green, Jr., 635.
Grula, E. A.
Bacterial cell membranes. I. Reaggregation of membrane subunits from *Micrococcus lysodeikticus*. T. F. Butler, G. L. Smith, and E. A. Grula, 1471.
Bacterial cell membranes. II. Possible structure of the basal membrane continuum of *Micrococcus lysodeikticus*. E. A. Grula, T. F. Butler, R. D. King, and G. L. Smith, 1499.
Guerin, L. F.
Antibody production in milk serum after virus instillation of goat mammary gland. I. Responses to influenza virus, mumps virus, and adenovirus 3. C. A. Mitchell, L. F. Guerin, and A. E. Pasieka, 1069.
Antibody production in milk serum after virus instillation of goat mammary gland. II. Biochemical isolation and purification of antibody to influenza virus. A. E. Pasieka, L. F. Guerin, and C. A. Mitchell, 1195.
Gunner, H. B.
Physiology of selenite reduction by enterococci. I. Influence of environmental variables. R. C. Tilton, H. B. Gunner, and W. Litsky, 1175.
Physiology of selenite reduction by enterococci. II. Characterization of selenite inhibition and its reversal by ascorbate. R. C. Tilton, H. B. Gunner, and W. Litsky, 1183.
Hall, H. H.
Preparation and characterization of intact and free spores of *Bacillus popilliae* Dutky. G. St. Julian, T. G. Pridham, and H. H. Hall, 279.
Aflatoxin G_1 uptake by cells of *Flavobacterium aurantiacum*. E. G. Lillehoj, A. Ciegler, and H. H. Hall, 629.
Halvorson, H.
The metabolism of phenylacetic acid by a *Pseudomonas*. E. R. Blakely, W. Kurz, H. Halvorson, and F. J. Simpson, 147.
The microbial production and some characteristics of δ-carboxymethyl-α-hydroxymuconic semialdehyde. E. R. Blakely, H. Halvorson, and W. Kurz, 159.
Hamilton, R. D.
Assay of relative heterotrophic potential in the sea: the use of specifically labelled glucose. R. D. Hamilton and K. E. Austin, 1165.
Hannah, D. E.
The growth of *Bacillus subtilis* in media containing chetomin, sporidesmin, and gliotoxin. D. Brewer, D. E. Hannah, R. Rahman, and A. Taylor, 1451.
Hannay, C. L.
The dissociation of *Bacillus thuringiensis*. C. L. Hannay, 1566.
Harrison, E. F.
Therapeutic activity of lysostaphin in experimental staphylococcal infections. E. F. Harrison and C. B. Cropp, 93.
Hartman, P. A.
Purification and partial characterization of *Thermoactinomyces vulgaris* amylases. M. J. Kuo and P. A. Hartman, 1157.
Hartman, R. E.
The effects of oxygen and carbon dioxide on proteinase biosynthesis by *Streptococcus faecalis* var. *liquefaciens*. J. F. Swiencicki and R. E. Hartman, 1445.
Haskins, E. F.
The use of spectrophotometry in an ecological investigation of the facultatively anaerobic purple photosynthetic bacteria. E. F. Haskins and T. Kihara, 1283.
Haskins, R. H.
Further studies on sterol stimulation of sexual reproduction in *Pythium*. J. H. Sietsma and R. H. Haskins, 361.
"Protoplasts" from *Pythium* sp. PRL 2142. J. H. Sietsma, D. E. Eveleigh, R. H. Haskins, and J. F. T. Spencer, 1701.
Hauschild, A. H. W.
Acid resistance and infectivity of food-poisoning *Clostridium perfringens*. A. H. W. Hauschild, R. Hilsheimer, and F. S. Thatcher, 1041.

Hendricks, C. W.
Strain alteration in enteric bacteria isolated from river water. C. W. Hendricks and S. M. Morrison, 271.
Hendry, A. T.
Bacteriophage studies of isolates from fire blight sources. A. T. Hendry, J. A. Carpenter, and E. H. Garrard, 1357.
Henis, Y.
Chemical composition of hypal and sclerotial walls of *Sclerotium rolfsii* Sacc. I. Chet, Y. Henis, and R. Mitchell, 137.
Effect of organic amendments on *Rhizoctonia* and accompanying microflora in soil. Y. Henis, B. Sneh, and J. Katan, 643.
The effect of yeast extract and Casitone on the response to salt of the microflora of a highly saline soil. P. Keller and Y. Henis, 1427.
Henry, C. E.
Virulence and cellulolytic activity of *Colletotrichum lagenarium*. C. E. Henry and E. D. Garber, 618.
Hilsheimer, R.
Acid resistance and infectivity of food-poisoning *Clostridium perfringens*. A. H. W. Hauschild, R. Hilsheimer, and F. S. Thatcher, 1041.
Hittle, L. L.
Some effects of hyperbaric oxygenation on bacteria at increased hydrostatic pressures. C. E. ZoBell and L. L. Hittle, 1311.
Hochster, R. M.
Serological comparisons between strains of *Agrobacterium tumefaciens*. R. M. Hochster and S. E. Cole, 569.
Hocking, D.
Evidence on intracellular sites of terminal synthesis of carotenoids in *Mucor hiemalis* Wehm. D. Hocking, 859.
Holmström, B.
Studies on the cultivation of *Listeria monocytogenes* in batch and continuous cultures. B. Holmström, 1551.
Horler, D. F.
Metabolism of histidine by *Peptococcus aerogenes*. W. B. McConnell, D. F. Horler, and D. W. S. Westlake, 143.
Hsu, C.
Antibacterial substances from staphylococci. C. Hsu and G. M. Wiseman, 947.
Hubbell, D. H.
Correlation of physiological characteristics with nodulating ability in *Rhizobium japonicum*. D. H. Hubbell and G. H. Elkan, 235.
Huber, F. M.
Changes in the fatty acids of *Cephalosporium acremonium* Corda and its growth medium. F. M. Huber and M. O. Redstone, 332.
Hunter, N. W.
Effect of certain cations on activity of leucine naphthylamidases of *Paramecium caudatum*. N. W. Hunter, 1133.
Huot, L.
Comparaison de toxicité de quelques éléments pour *Bacillus thuringiensis* var. *thuringiensis* Berl. J. M. Perron, W. A. Smirnoff et L. Huot, 81.
Husain, S. A.
Sulfur isotope fractionation by *Salmonella* species. H. R. Krouse, R. G. L. McCready, S. A. Husain, and J. N. Campbell, 21.
Inniss, W. E.
Studies on a lesion-inducing factor of avian strains of *Escherichia coli*. R. B. Truscott and W. E. Inniss, 9.
Studies on the effect of gentamicin on *Proteus vulgaris*. W. E. Inniss and J. J. McEvoy, 243.
Ishihara, R.
Stimuli causing extrusion of polar filaments of *Glugea fumiferanae* spores. R. Ishihara, 1321.
Jackson, H. R.
Differential staining of bacteriophage plaques for photography. H. R. Jackson, 117.
Jay, J. M.
Inhibition of staphylococcal bacteriophages by trypan blue and trypan blue – calcium combinations. J. M. Jay, 337.
Johnson, E. J.
Phosphorylation coupled to the oxidation of sulfite and 2-mercaptoethanol in extracts of *Thiobacillus thioparus*. E. A. Davis and E. J. Johnson, 873.
Distribution of heat-labile and heat-stable inorganic pyrophosphatases among some bacteria. B. I. Blumenthal, M. K. Johnson, and E. J. Johnson, 1695.

Johnson, G. G.
The extracellular protease from *Pseudomonas aeruginosa* exhibiting elastase activity. G. G. Johnson, J. M. Morris, and R. S. Berk, 711.
Johnson, M. K.
Distribution of heat-labile and heat-stable inorganic pyrophosphatases among some bacteria. B. I. Blumenthal, M. K. Johnson, and E. J. Johnson, 1695.
Johnson, R. C.
Metabolism of leptospires. II. The action of 8-azaguanine. R. C. Johnson and P. Rogers, 1621.
Jones, G. E.
Marine thiobacilli. I. Isolation and distribution. R. C. Tilton, A. B. Cobet, and G. E. Jones, 1521.
Marine thiobacilli. II. Culture and ultrastructure. R. C. Tilton, G. J. Stewart, and G. E. Jones, 1529.
Jones, W. L.
Determination of volatile acid production *Clostridium* by gas chromatography. V. J. Lewis, C. W. Moss, and W. L. Jones, 1033.
Kalnins, K.
Keto acids produced by *Chlamydomonas reinhardti*. R. P. Collins and K. Kalnins, 995.
Kasatiya, S. S.
Nature of the determinant of tetracycline resistance in *Staphylococcus aureus*. S. S. Kasatiya and J. N. Baldwin, 1079.
Katan, J.
Effect of organic amendments on *Rhizoctonia* and accompanying microflora in soil. Y. Henis, B. Sneh, and J. Katan, 643.
Keen, N. T.
Effect of nutritional factors on extracellular protease production by *Pseudomonas lachrymans*. N. T. Keen and P. H. Williams, 863.
Keenan, T. W.
Acetone in milk cultures of lactic streptococci and *Leuconostoc citrovorum*. T. W. Keenan, D. D. Bills, and R. C. Lindsay, 1118.
Keller, P.
The effect of yeast extract and Casitone on the response to salt of the microflora of a highly saline soil. P. Keller and Y. Henis, 1427.
Kihara, T.
The use of spectrophotometry in an ecological investigation of the facultatively anaerobic purple photosynthetic bacteria. E. F. Haskins and T. Kihara, 1283.
King, R. D.
Bacterial cell membranes. II. Possible structure of the basal membrane continuum of *Micrococcus lysodeikticus*. E. A. Grula, T. F. Butler, R. D. King, and G. L. Smith, 1499.
Kistner, A.
Continuous culture of anaerobic rumen bacteria: modification and extension of the cyclone column culture system. A. Kistner and J. G. van Zyl, 455.
Klein, D. A.
Occurrence and enumeration of *Bdellovibrio bacteriovorus* in soil capable of parasitizing *Escherichia coli* and indigenous soil bacteria. D. A. Klein and L. E. Casida, Jr., 1235.
Escherichia coli die-out from normal soil as related to nutrient availability and the indigenous microflora. D. A. Klein and L. E. Casida, Jr., 1461.
Kobr, M. J.
The effect of oxygen tension on growth, conidiation, and alcohol production of *Neurospora crassa*. M. J. Kobr, D. E. Bianchi, N. Oulevey, and G. Turian, 805.
Kocka, F. E.
Resistance to actinomycin D of *Escherichia coli* after frozen storage. H. W. Bretz and F. E. Kocka, 914.
Kohn, P.
Isolation and identification of trehalose from *Pullularia pullulans*. E. Merdinger and P. Kohn, 1126.
Konowalchuk, J.
Studies on plaque variants of coxsackievirus B5 by burst analyses. J. Konowalchuk and J. I. Speirs, 167.
Korngold, R. R.
The lysis of a psychrophilic marine bacterium as studied by microelectrophoresis. J. R. Madeley, R. R. Korngold, D. J. Kushner, and N. E. Gibbons, 45.
Krouse, H. R.
Sulfur isotope fractionation by *Salmonella* species. H. R. Krouse, R. G. L. McCready, S. A. Husain, and J. N. Campbell, 21.

Kuehner, C. C.
Effect of rose bengal and light on the growth of *Aspergillus niger*. C. C. Kuehner and G. Mitrovich, 27.
Kuo, M. J.
Purification and partial characterization of *Thermoactinomyces vulgaris* amylases. M. J. Kuo and P. A. Hartman, 1157.
Kuroda, S.
Temperature-sensitive replication of an actinophage for *Streptomyces aureofaciens*. S. Kuroda and S. G. Bradley, 1569.
Kurz, W.
The metabolism of phenylacetic acid by a *Pseudomonas*. E. R. Blakley, W. Kurz, H. Halvorson, and F. J. Simpson, 147.
The microbial production and some characteristics of δ-carboxymethyl-α-hydroxymuconic semialdehyde. E. R. Blakley, H. Halvorson, and W. Kurz, 159.
Kushe, S. V.
Occurrence and nature of spirilla around Bombay. S. V. Kushe and S. A. Dhala, 907.
Kushner, D. J.
The lysis of a psychrophilic marine bacterium as studied by microelectrophoresis. J. R. Madeley, R. R. Korngold, D. J. Kushner, and N. E. Gibbons, 45.
Labelle, C.
Emploi d'analogues de l'adénine dans l'étude de la spécificité de l'inhibition par cette purine de la croissance de la souche Wood 46 de *Staphylococcus aureus*. J. de Repentigny, C. Labelle et S. Sonea, 919.
Lackman, D. B.
Rickettsia canada: a new member of the typhus group of rickettsiae isolated from *Haemaphysalis leporispalustris* ticks in Canada. J. A. McKiel, E. J. Bell, and D. B. Lackman, 503.
Landesman, J.
Role of *Thiobacillus ferrooxidans* in the oxidation of sulfide minerals. D. W. Duncan, J. Landesman, and C. C. Walden, 397.
Lange, W.
Growth of *Fusarium diversisporum* Sherb. on long-chain *n*-fatty alcohols or cholesterol as the sole carbon source. R. G. Strobel, H. Quinn, and W. Lange, 121.
LaRue, T. A.
The utilization of D-amino acids by yeasts. T. A. LaRue and J. F. T. Spencer, 777.
The utilization of imidazoles by yeasts. T. A. LaRue and J. F. T. Spencer, 789.
Leben, C.
Population variations of epiphytic bacteria. C. Leben and G. C. Daft, 1151.
Lees, H.
The production of $^{13}N_2$ by 50-MeV protons for use in biological nitrogen fixation. N. E. R. Campbell, R. Dular, H. Lees, and K. G. Standing, 587.
Carbon dioxide fixation and phosphoenolpyruvate carboxylase in *Ferrobacillus ferrooxidans*. G. A. Din, I. Suzuki, and H. Lees, 1413.
Lesley, S. M.
Production of radioactive myxin. S. M. Lesley, R. M. Behki, and D. C. Gillespie, 1251.
Lewis, J. A.
Effects of tannins on spore germination and growth of *Fusarium solani* f. *phaseoli* and *Verticillium albo-atrum*. J. A. Lewis and G. C. Papavizas, 1655.
Lewis, V. J.
Determination of volatile acid production of *Clostridium* by gas chromatography. V. J. Lewis, C. W. Moss, and W. L. Jones, 1033.
Li, M. F.
A proteolytic pseudomonad from skin lesions of rainbow trout (*Salmo gairdnerii*). I. Characteristics of the pathogenic effects and the extracellular proteinase. M. F. Li and C. Flemming, 405.
Lillehoj, E. G.
Aflatoxin G_1 uptake by cells of *Flavobacterium aurantiacum*. E. G. Lillehoj, A. Ciegler, and H. H. Hall, 629.
Lindsay, R. C.
Acetone in milk cultures of lactic streptococci and *Leuconostoc citrovorum*. T. W. Keenan, D. D. Bills, and R. C. Lindsay, 1118.
Litsky, W.
Physiology of selenite reduction by enterococci. I. Influence of environmental variables. R. C. Tilton, H. B. Gunner, and W. Litsky, 1175.
Physiology of selenite reduction by enterococci. II. Characterization of selenite inhibition and its reversal by ascorbate. R. C. Tilton, H. B. Gunner, and W. Litsky, 1183.
Lockwood, J. L.
Accumulation of DDT and Dieldrin by microorganisms. C. I. Chacko and J. L. Lockwood, 1123.

Loos, M. A.
Phenols as intermediates in the decomposition of phenoxyacetates by an *Arthrobacter* species. M. A. Loos, R. N. Roberts, and M. Alexander, 679.
Formation of 2,4-dichlorophenol and 2,4-dichloroanisole from 2,4-dichlorophenoxyacetate by *Arthrobacter* sp. M. A. Loos, R. N. Roberts, and M. Alexander, 691.
López-Belmonte, F.
Vacuoles of fungal protoplasts. I. Garcia-Acha, F. López-Belmonte, and J. R. Villanueva, 433.
Luchsinger, W. W.
Beta-(1→3)- and beta-(1→4)-D-glucanase production by three fungi. G. L. Schneberger and W. W. Luchsinger, 901.
Beta-D-glucanases of *Schizophyllum commune*. G. L. Schneberger and W. W. Luchsinger, 969.
McConnell, W. B.
Metabolism of histidine by *Peptococcus aerogenes*. W. B. McConnell, D. F. Horler, and D. W. S. Westlake, 143.
McCready, R. G. L.
Sulfur isotope fractionation by *Salmonella* species. H. R. Krouse, R. G. L. McCready, S. A. Husain, and J. N. Campbell, 21.
McCurdy, H. D.
Deoxyribonucleic acid base compositions of fruiting Myxobacterales. H. D. McCurdy and S. Wolf, 1707.
MacDonald, J. C.
The isolation of pulcherriminic acid from *Bacillus cereus*. J. C. MacDonald, 17.
McDonald, W. C.
Inhibition of spore outgrowth in *Bacillus subtilis* by chloroquin. W. C. McDonald, 611.
McEvoy, J. J.
Studies on the effect of gentamicin on *Proteus vulgaris*. W. E. Inniss and J. J. McEvoy, 243.
McKiel, J. A.
Rickettsia canada: a new member of the typhus group of rickettsiae isolated from *Haemaphysalis leporispalustris* ticks in Canada. J. A. McKiel, E. J. Bell, and D. B. Lackman, 503.
McManus, E. A.
Development of a method for the total count of marine bacteria on algae. E. C. S. Chan and E. A. McManus, 295.
Macmorine, H. G.
Removal of pyrogens from poliomyelitis vaccine. H. G. Macmorine and J. M. Tracy, 329.
MacRae, I. C.
The effect of the gamma isomer of benzine hexachloride upon the microflora of submerged rice soils. I. Effect upon algae. K. Raghu and I. C. MacRae, 173.
The effect of the gamma isomer of benzene hexachloride upon the microflora of submerged rice soils. II. Effect upon nitrogen mineralization and fixation, and selected bacteria. K. Raghu and I. C. MacRae, 621.
McVeigh, I.
Toxicity of copper to *Escherichia coli* in relation to incubation temperature and method of sterilization of media. C. M. W. Burke and I. McVeigh, 1299.
Madeley, J. R.
The lysis of a psychrophilic marine bacterium as studied by microelectrophoresis. J. R. Madeley, R. R. Korngold, D. J. Kushner, and N. E. Gibbons, 45.
Madhosingh, C.
Sterol and fatty acid components of mycelium of *Fusarium oxysporum*. A. N. Starratt and C. Madhosingh, 1351.
Manasse, R. J.
Chemical composition of cell envelopes from *Agrobacterium tumefaciens*. R. J. Manasse and W. A. Corpe, 1591.
Mandel, M.
The taxonomy of enterococci. R. R. Colwell, M. Mandel, and H. Raj, 917.
Maniar, A. C.
Prevalence of staphylococcal anti-delta lysin in man. A. C. Maniar, C. Weslake, and P. Warner, 925.
Marois, P.
Effet de l'inoculation subséquente du virus SV_{40} sur la transplantation de cellules transformées par ce virus. R. Dubreuil, E. Di Franco, V. Pavilanis et P. Marois, 543.
Tumeurs à virus SV 40: réduction des récidives tumorales post-opératoires chez le hamster par l'administration du virus; résistance à une seconde transplantation. R. Dubreuil, E. Di Franco, V. Pavilanis et P. Marois, 1433.

Martin, E. V.
On the synthesis of inducible penicillinase enzyme by spheroplasts of *Bacillus cereus*. S. D. Wainwright and E. V. Martin, 334.
Martin, W. J.
The deoxyribonuclease test as applied to certain gram-negative bacteria. W. J. Martin and W. H. Ewing, 616.
Mathur, S. P.
Microbial utilization of soil humic acids. S. P. Mathur and E. A. Paul, 573.
Partial characterization of soil humic acids through biodegradation. S. P. Mathur and E. A. Paul, 581.
Matikian, N.
See Oulevey, N.
Merdinger, E.
Isolation and identification of trehalose from *Pullularia pullulans*. E. Merdinger and P. Kohn, 1126.
Milazzo, F. H.
The effect of some cultural conditions on the arylsulfatase of *Proteus rettgeri*. F. H. Milazzo and J. W. Fitzgerald, 659.
Mills, C.
Pellicle formation and ester production by *Hansenula anomala*. C. Mills and A. C. Blackwood, 1259.
Mitchell, C. A.
Antibody production in milk serum after virus instillation of goat mammary gland. I. Responses to influenza virus, mumps virus, and adenovirus 3. C. A. Mitchell, L. F. Guerin, and A. E. Pasieka, 1069.
Antibody production in milk serum after virus instillation of goat mammary gland. II. Biochemical isolation and purification of antibody to influenza virus. A. E. Pasieka, L. F. Guerin, and C. A. Mitchell, 1195.
Mitchell, R.
Chemical composition of hyphal and sclerotial walls of *Sclerotium rolfsii* Sacc. I. Chet, Y. Henis, and R. Mitchell, 137.
Mitrovich, G.
Effect of rose bengal and light on the growth of *Aspergillus niger*. C. C. Kuehner and G. Mitrovich, 27.
Molina, J. A. E.
The effect of antimetabolites on nodulation and growth of leguminous plants. J. A. E. Molina and M. Alexander, 819.
Moreau, P.
A rapid micro tissue culture assay in BS-C-1 cells for the titration and neutralization of measles virus. P. Moreau and J. Furesz, 313.
Moriarity, A. J.
Resistance to actinomycin D in *Lactobacillus casei*. J. Donaldson and A. J. Moriarity, 113.
Morris, J. M.
The extracellular protease from *Pseudomonas aeruginosa* exhibiting elastase activity. G. G. Johnson, J. M. Morris, and R. S. Berk, 711.
Morris, O. N.
A virus disease of *Ectropis crepuscularia* Schiff. (Geometridae:Lepidoptera). O. N. Morris, 855.
Morrison, S. M.
Strain alteration in enteric bacteria isolated from river water. C. W. Hendricks and S. M. Morrison, 271.
Moskovits, G.
Growth of marine bacteria on some organic acids and its application to the selective isolation of pseudomonads. G. Moskovits and A. Flanagan, 1561.
Moss, C. W.
Determination of volatile acid production of *Clostridium* by gas chromatography. V. J. Lewis, C. W. Moss, and W. J. Jones, 1033.
Nermut, M. V.
Sites of "glycine oxidase" activity in *Proteus vulgaris*. M. V. Nermut, 551.
Niederpruem, D. J.
Control of β-glucosidases in *Schizophyllum commune*. R. W. Wilson and D. J. Niederpruem, 1009.
Cellobiose as a paramorphogen in *Schizophyllum commune*. R. W. Wilson and D. J. Niederpruem, 1663.
Niemelä, S.
A study of faecal bacteria in the River Kymi (southeast Finland). S. Niemelä and E. Tirronen, 1087.

Noller, E. C.
Time-lapse cinematography of vancomycin-treated microbial cells. N. N. Durham, E. C. Noller, M. W. Burger, and G. K. Best, 417.
Obaton, M.
Polysaccharides extracellulaires de *Rhizobium meliloti*. N. Amarger, M. Obaton et H. Blachère, 99.
Ortiz, J. S.
A comparison of rat and rabbit sera bactericidins active against staphylococci. W. W. Yotis and J. S. Ortiz, 885.
Oulevey, N. (née Matikian)
The effect of oxygen tension on growth, conidiation, and alcohol production of *Neurospora crassa*. M. J. Kobr, D. E. Bianchi, N. Oulevey, and G. Turian, 805.
Pandey, K. R.
Population dynamics of *Pythium aphanidermatum* in oil cake amended soils. R. S. Singh and K. R. Pandey, 601.
Papavizas, G. C.
Effects of tannins on spore germination and growth of *Fusarium solani* f. *phaseoli* and *Verticillium albo-atrum*. J. A. Lewis and G. C. Papavizas, 1655.
Parisi, J. T.
Factors affecting the selection of chromogenic variants of *Staphylococcus aureus*. J. T. Parisi and J. N. Baldwin, 110.
Parkinson, D.
The initiation of the rhizosphere mycoflora of dwarf bean plants. A. Thomas and D. Parkinson, 439.
Pasieka, A. E.
Antibody production in milk serum after virus instillation of goat mammary gland. I. Responses to influenza virus, mumps virus, and adenovirus 3. C. A. Mitchell, L. F. Guerin, and A. E. Pasieka, 1069.
Antibody production in milk serum after virus instillation of goat mammary gland. II. Biochemical isolation and purification of antibody to influenza virus. A. E. Pasieka, L. F. Guerin, and C. A. Mitchell, 1195.
Pathak, S. G.
Use of dried mycelium of *Penicillium chrysogenum* as the only constituent of seed medium in penicillin fermentation. S. G. Pathak, 730.
Paul, E. A.
Microbial utilization of soil humic acids. S. P. Mathur and E. A. Paul, 573.
Partial characterization of soil humic acids through biodegradation. S. P. Mathur and E. A. Paul, 581.
The role of anaerobiosis in asymbiotic nitrogen fixation. W. A. Rice, E. A. Paul, and L. R. Wetter, 829.
Pavilanis, V.
Effet de l'inoculation subséquente du virus SV_{40} sur la transplantation de cellules transformées par ce virus. R. Dubreuil, E. Di Franco, V. Pavilanis et P. Marois, 543.
Tumeurs à virus SV 40: réduction des récidives tumorales post-opératoires chez le hamster par l'administration du virus; résistance à une seconde transplantation. R. Dubreuil, E. Di Franco, V. Pavilanis et P. Marois, 1433.
Pentland, G.
Ethanol produced by *Aureobasidium pullulans* and its effect on the growth of *Armillaria mellea*. G. Pentland, 1631.
Perron, J. M.
Comparaison de toxicité de quelques éléments pour *Bacillus thuringiensis* var. *thuringiensis* Berl. J. M. Perron, W. A. Smirnoff et L. Huot, 81.
Perry, M. B.
D-*glycero*-D-*manno*-Heptose as a component of lipopolysaccharides from Gram-negative bacteria. G. A. Adams, C. Quadling, and M. B. Perry, 1605.
Peterson, E. A.
Soil microorganisms associated with flax roots. E. A. Peterson and J. W. Rouatt, 199.
Petrovici, A.
Modifications enzymatiques et morphologiques chez *Brucella suis* traitée par l'interféron. V. F. Dima, A Petrovici, J. Szabados, Th. Vasilesco, A. Pop et K. Rudesco, 721.
Pop, A.
Modifications enzymatiques et morphologiques chez *Brucella suis* traitée par l'interféron. V. F. Dima, A. Petrovici, J. Szabados, Th. Vasilesco, A. Pop et K. Rudesco, 721.
Post, A. H.
Soil mineralogy as possible factor in geographic distribution of *Histoplasma capsulatum*. G. Stotzky and A. H. Post, 1.

Powers, M. T.
Glucose repression of oxidation of organic compounds by *Sphaerotilus*. J. L. Stokes and M. T. Powers, 557.
Pridham, T. G.
Preparation and characterization of intact and free spores of *Bacillus popilliae* Dutky. G. St. Julian, T. G. Pridham, and H. H. Hall, 279.
Provost, P. J.
A comparison of the osmotic and passive permeability properties of *Mycoplasma laidlawii* and *Mycoplasma hominis*. D. M. Spears and P. J. Provost, 213.
Quadling, C.
Evaluation of tests and grouping of cultures by a two-stage principal component method. C. Quadling, 1379.
D-*glycero*-D-*manno*-Heptose as a component of lipopolysaccharides from Gram-negative bacteria. G. A. Adams, C. Quadling, and M. B. Perry, 1605.
Quinn, H.
Growth of *Fusarium diversisporum* Sherb. on long-chain *n*-fatty alcohols or cholesterol as the sole carbon source. R. G. Strobel, H. Quinn, and W. Lange, 121.
Raghu, K.
The effect of the gamma isomer of benzene hexachloride upon the microflora of submerged rice soils. I. Effect upon algae. K. Raghu and I. C. MacRae, 173.
The effect of the gamma isomer of benzene hexachloride upon the microflora of submerged rice soils. II. Effect upon nitrogen mineralization and fixation, and selected bacteria. K. Raghu and I. C. MacRae, 621.
Rahman, R.
The growth of *Bacillus subtilis* in media containing chetomin, sporidesmin, and gliotoxin. D. Brewer, D. E. Hannah, R. Rahman, and A. Taylor, 1451.
Raj, H.
The taxonomy of enterococci. R. R. Colwell, M. Mandel, and H. Raj, 917.
Ramakrishna Rao, K.
Studies on the characterization of tyrosinase of *Fusarium vasinfectum* Atk. K. Ramakrishna Rao and E. R. B. Shanmugasundaram, 427.
Redstone, M. O.
Changes in the fatty acids of *Cephalosporium acremonium* Corda and its growth medium. F. M. Huber and M. O. Redstone, 332.
Rem, L. T.
Influence of clay minerals on microorganisms. IV. Montmorillonite and kaolinite on fungi. G. Stotzky and L. T. Rem, 1535.
Rice, W. A.
The role of anaerobiosis in asymbiotic nitrogen fixation. W. A. Rice, E. A. Paul, and L. R. Wetter, 829.
Robb, L. A.
Separation of tetanus toxin and toxoid proteins by Sephadex gel. L. A. Robb, 1021.
Roberts, R. N.
Phenols as intermediates in the decomposition of phenoxyacetates by an *Arthrobacter* species. M. A. Loos, R. N. Roberts, and M. Alexander, 679.
Formation of 2,4-dichlorophenol and 2,4-dichloroanisole from 2,4-dichlorophenoxyacetate by *Arthrobacter* sp. M. A. Loos, R. N. Roberts, and M. Alexander, 691.
Rodriguez-Kabana, R.
Effect of atrazine on growth response of *Sclerotium rolfsii* and *Trichoderma viride*. R. Rodriguez-Kabana, E. A. Curl, and H. H. Funderburk, Jr., 1343.
Rogers, P.
Metabolism of leptospires. II. The action of 8-azaguanine. R. C. Johnson and P. Rogers, 1621.
Rokosh, D. A.
Some observations concerning DNA and β-galactosidase synthesis in *Escherichia coli* B. S. J. Webb, J. Singh Bhorjee, J. L. Walker, and D. A. Rokosh 377.
Roslycky, E. B.
Bacteriocin production in the rhizobia bacteria. E. B. Roslycky, 431.
Rouatt, J. W.
Soil microorganisms associated with flax roots. E. A. Peterson and J. W. Rouatt, 199.
Rudesco, K.
Modifications enzymatiques et morphologiques chez *Brucella suis* traitée par l'interféron. V. F. Dima, A. Petrovici, J. Szabados, Th. Vasilesco, A. Pop et K. Rudesco, 721.
Ryschenkow, E. I.
Mycoplasma pseudocolonies from cultures of buffy coat of blood. E. I. Ryschenkow, P. T. Wertlake, and V. M. Young, 1053.

St. Julian, G.
Preparation and characterization of intact and free spores of *Bacillus popilliae* Dutky. G. St. Julian, T. G. Pridham, and H. H. Hall, 279.
Sattar, S. A.
Plastic chambers for the cultivation of cells on microscope slides and their application in virology. S. A. Sattar and J. C. N. Westwood, 1107.
Immunofluorescence in the study of viruses in tissue culture. I. Development of an immunofluorescent focus assay for herpes simplex virus. S. A. Sattar and J. C. N. Westwood, 1489.
Schneberger, G. L.
Beta-(1→3)-and beta-(1→4)-D-glucanase production by three fungi. G. L. Schneberger and W. W. Luchsinger, 901.
Beta-D-glucanases of *Schizophyllum commune*. G. L. Schneberger and W. W. Luchsinger, 969.
Schuetze, P. L.
Reversible "paralysis" of the flagella of certain Gram-negative bacteria. P. L. Schuetze and R. N. Doetsch, 1114.
Schwartz, S. O.
Certain physical and chemical properties of two murine leukemia viruses. E. R. Brown, P. Buinauskas, and S. O. Schwartz, 957.
Seaman, A.
Growth of *Byssochlamys nivea* in various carbon dioxide atmospheres. A. R. Yates, A. Seaman, and M. Woodbine, 1120.
Sehgal, S. N.
Transformation of steroids by *Mucor griseo-cyanus*. K. Singh, S. N. Sehgal, and C. Vézina, 1271.
Shanmugasundaram, E. R. B.
Studies on the characterization of tyrosinase of *Fusarium vasinfectum* Atk. K. Ramakrishna Rao and E. R. B. Shanmugasundaram, 427.
Shults, F. S.
The relationship between immune response and hydrolase activity in rat mononuclear leucocytes. F. S. Shults and J. M. Woodward, 795.
Sierra, G.
Germination of bacterial endospores with subtilopeptidases. G. Sierra, 489.
Dissociation of esterase from proteinase activity of *Bacillus subtilis* spores. G. Sierra, 673.
Sietsma, J. H.
Further studies on sterol stimulation of sexual reproduction in *Pythium*. J. H. Sietsma and R. H. Haskins, 361.
"Protoplasts" from *Pythium* sp. PRL 2142. J. H. Sietsma, D. E. Eveleigh, R. H. Haskins, and J. F. T. Spencer, 1701.
Silbernagel, S. B.
Bioassay of seawater. IV. The determination of dissolved biotin in seawater using ^{14}C uptake by cells of *Amphidinium carteri*. A. F. Carlucci and S. B. Silbernagel, 979.
Simpson, F. J.
The metabolism of phenylacetic acid by a *Pseudomonas*. E. R. Blakley, W. Kurz, H. Halvorson, and F. J. Simpson, 147.
Singh, K.
Transformation of steroids by *Mucor griseo-cyanus*. K. Singh, S. N. Sehgal, and C. Vézina, 1271.
Singh, R. S.
Population dynamics of *Pythium aphanidermatum* in oil cake amended soils. R. S. Singh and K. R. Pandey, 601.
Singh Bhorjee, J.
The effect of 3000–4000 Å light on the synthesis of β-galactosidase and bacteriophages by *Escherichia coli* B. S. J. Webb and J. Singh Bhorjee, 69.
Some observations concerning DNA and β-galactosidase synthesis in *Escherichia coli* B. S. J. Webb, J. Singh Bhorjee, J. L. Walker, and D. A. Rokosh, 377.
Smirnoff, W. A.
Comparaison de toxicité de quelques éléments pour *Bacillus thuringiensis* var. *thuringiensis* Berl. J. M. Perron, W. A. Smirnoff et L. Huot, 81.
Smith, G. L.
Bacterial cell membranes. I. Reaggregation of membrane subunits from *Micrococcus lysodeikticus*. T. F. Butler, G. L. Smith, and E. A. Grula, 1471.
Bacterial cell membranes. II. Possible structure of the basal membrane continuum of *Micrococcus lysodeikticus*. E. A. Grula, T. F. Butler, R. D. King, and G. L. Smith, 1499.
Smith, R. F.
Nuclease activity of streptococci. R. F. Smith and H. L. Bodily, 1295.

Sneh, B.
Effect of organic amendments on *Rhizoctonia* and accompanying microflora in soil. Y. Henis, B. Sneh, and J. Katan, 643.
Soltys, M. A.
Comparative studies of immunogenic properties of *Trypanosoma brucei* inactivated with β-propiolactone and with some other inactivating agents. M. A. Soltys, 743.
Sonea, S.
Emploi d'analogues de l'adénine dans l'étude de la spécificité de l'inhibition par cette purine de la croissance de la souche Wood 46 de *Staphylococcus aureus*. J. de Repentigny, C. Labelle et S. Sonea, 919.
Sowden, L. C.
The induction of birefringence in pellicles of bacterial cellulose from *Acetobacter xylinum* by lipids. J. H. Carson, L. C. Snowden, and J. R. Colvin, 837.
Spears, D. M.
A comparison of the osmotic and passive permeability properties of *Mycoplasma laidlawii* and *Mycoplasma hominis*. D. M. Spears and P. J. Provost, 213.
Speirs, J. I.
Studies on plaque variants of coxsackievirus B5 by burst analyses. J. Konowalchuk and J. I. Speirs, 167.
Spencer, J. F. T.
The utilization of D-amino acids by yeasts. T. A. LaRue and J. F. T. Spencer, 777.
The utilization of imidazoles by yeasts. T. A. LaRue and J. F. T. Spencer, 789.
"Protoplasts" from *Pythium* sp. PRL 2142. J. H. Sietsma, D. E. Eveleigh, R. H. Haskins, and J. F. T. Spencer, 1701.
Spoerl, E.
The influence of some hexitols and sugars on CO_2 production by starved and X-irradiated starved yeast cells. E. Spoerl and R. J. Doyle, 811.
Stainer, D. W.
Preparation and properties of diphtheria toxoids in submerged culture. I. Presence of bovine antigens. D. W. Stainer, 963.
Separation of bovine sensitizing material from papain digest of beef broth. D. W. Stainer, 1001.
Staley, J. T.
L-Serine dehydratase (deaminase) of psychrophiles and mesophiles from polar and temperate habitats. J. T. Staley and W. L. Boyd, 1333.
Standing, K. G.
The production of $^{13}N_2$ by 50-MeV protons for use in biological nitrogen fixation. N. E. R. Campbell, R. Dular, H. Lees, and K. G. Standing, 587.
Starratt, A. N.
Sterol and fatty acid components of mycelium of *Fusarium oxysporum*. A. N. Starratt and C. Madhosingh, 1351.
Stevenson, I. L.
Utilization of aromatic hydrocarbons by *Arthrobacter* spp. I. L. Stevenson, 205.
Stevenson, J. W.
An antiviral substance from *Penicillium cyaneo-fulvum* Biourge. III. Studies on the nature of the antiviral substance. D. Syeklocha, P. M. Cooke, and J. W. Stevenson, 1481.
Stewart, G. J.
Marine thiobacilli. II. Culture and ultrastructure. R. C. Tilton, G. J. Stewart, and G. E. Jones, 1529.
Stewart, R. B.
Variation in sensitivity of an interferon assay system. R. B. Stewart and S. S. Gandhi, 1421.
Stine, G. J.
Synchronous production of conidiophores and conidia of *Neurospora crassa*. G. J. Stine and A. M. Clark, 447.
Enzyme activities during the asexual cycle of *Neurospora crassa*. I. Succinic dehydrogenase. G. J. Stine, 1203.
Stokes, J. L.
Glucose repression of oxidation of organic compounds by *Sphaerotilus*. J. L. Stokes and M. T. Powers, 557.
Stotzky, G.
Soil mineralogy as possible factor in geographic distribution of *Histoplasma capsulatum*. G. Stotzky and A. H. Post, 1.
Influence of clay minerals on microorganisms. IV. Montmorillonite and kaolinite on fungi. G. Stotzky and L. T. Rem, 1535.
Strobel, R. G.
Growth of *Fusarium diversisporum* Shreb. on long-chain *n*-fatty alcohols or cholesterol as the sole carbon source. R. G. Strobel, H. Quinn, and W. Lange, 121.

Subba-Rao, N. S.
Phosphate solubilization by fungi associated with legume root nodules. P. K. Chhonkar and N. S. Subba-Rao, 749.
Sundman, V.
A comment on the nutritional grouping of soil bacteria. V. Sundman and G. Carlberg, 565.
Suzuki, I.
Carbon dioxide fixation and phosphoenolpyruvate carboxylase in *Ferrobacillus ferrooxidans*. G. A. Din, I. Suzuki, and H. Lees, 1413.
Swiencicki, J. F.
The effects of oxygen and carbon dioxide on proteinase biosynthesis by *Streptococcus faecalis* var. *liquefaciens*. J. F. Swiencicki and R. E. Hartman, 1445.
Syeklocha, D.
An antiviral substance from *Penicillium cyaneo-fulvum* Biourge. III. Studies on the nature of the antiviral substance. D. Syeklocha, P. M. Cooke, and J. W. Stevenson, 1481.
Szabados, J.
Modifications enzymatiques et morphologiques chez *Brucella suis* traitée par l'interféron. V. F. Dima, A. Petrovici, J. Szabados, Th. Vasilesco, A. Pop et K. Rudesco, 721.
Tang, T. C.
Effect of temperature on radiation resistance of spores of *Clostridium botulinum* 33A. N. Grecz, J. Upadhyay, and T. C. Tang, 287.
Tavormina, P. A.
Lytic action of lysostaphin on susceptible and resistant strains of *Staphylococcus aureus*. W. A. Zygmunt, H. P. Browder, and P. A. Tavormina, 845.
Taylor, A.
The growth of *Bacillus subtilis* in media containing chetomin, sporidesmin, and gliotoxin. D. Brewer, D. E. Hannah, R. Rahman, and A. Taylor, 1451.
The biological properties of 3,6-epithiadiketopiperazines. Degradation of gliotoxin-B by *Bacillus subtilis* (HLX 373). D. Brewer and A. Taylor, 1577.
Thacore, H.
Formation of spheroplasts of *Mycobacterium tuberculosis* by lysozyme in combination with certain enzymes of rabbit peritoneal monocytes. H. P. Willett and H. Thacore, 481.
Thatcher, F. S.
Acid resistance and infectivity of food-poisoning *Clostridium perfringens*. A. H. W. Hauschild, R. Hilsheimer, and F. S. Thatcher, 1041.
Thomas, A.
The initiation of the rhizosphere mycoflora of dwarf bean plants. A. Thomas and D. Parkinson, 439.
Tilton, R. C.
Physiology of selenite reduction by enterococci. I. Influence of environmental variables. R. C. Tilton, H. B. Gunner, and W. Litsky, 1175.
Physiology of selenite reduction by enterococci. II. Characterization of selenite inhibition and its reversal by ascorbate. R. C. Tilton, H. B. Gunner, and W. Litsky, 1183.
Marine thiobacilli. I. Isolation and distribution. R. C. Tilton, A. B. Cobet, and G. E. Jones, 1521.
Marine thiobacilli. II. Culture and ultrastructure. R. C. Tilton, G. J. Stewart, and G. E. Jones, 1529.
Tirronen, E.
A study of faecal bacteria in the River Kymi (southeast Finland). S. Niemelä and E. Tirronen, 1087.
Tischer, R. G.
Carbohydrate metabolism in *Hydrogenomonas eutropha*. D. W. Cook, R. G. Tischer, and L. R. Brown, 701.
Tonnis, S. M.
Role of manganese in biosynthesis of bacitracin. E. D. Weinberg and S. M. Tonnis, 614.
Tracy, J. M.
Removal of pyrogens from poliomyelitis vaccine. H. G. Macmorine and J. M. Tracy, 329.
Tribe, H. T.
Investigations into the basis of microbial ecology in soil, illustrated with reference to growth of soil diphtheroids and azotobacter in a model system. H. T. Tribe and P. A. Williams, 467.
Truscott, R. B.
Studies on a lesion-inducing factor of avian strains of *Escherichia coli*. R. B. Truscott and W. E. Inniss, 9.
Turian, G.
The effect of oxygen tension on growth, conidiation, and alcohol production of *Neurospora crassa*. M. J. Kobr, D. E. Bianchi, N. Oulevey, and G. Turian, 805.

Tyrrell, D.
The fatty acid compositions of 17 *Entomophthora* isolates. D. Tyrrell, 755.
Unz, R. F.
The predominant bacteria in natural zoogloeal colonies. I. Isolation and identification. R. F. Unz and N. C. Dondero, 1671.
The predominant bacteria in natural zoogloeal colonies. II. Physiology and nutrition. R. F. Unz and N. C. Dondero, 1683.
Upadhyay, J.
Effect of temperature on radiation resistance of spores of *Clostridium botulinum* 33A. N. Grecz, J. Upadhyay, and T. C. Tang, 287.
Vaartaja, O.
Reinfestation of sterilized nursery seedbeds by fungi. O. Vaartaja, 771.
The influence of nitrogenous compounds on growth of *Pythium* species. V. P. Agnihotri and O. Vaartaja, 1509.
van Zyl, J. G.
Continuous culture of anaerobic rumen bacteria: modification and extension of the cyclone column culture system. A. Kistner and J. G. van Zyl, 455.
Vasilesco, Th.
Modifications enzymatiques et morphologiques chez *Brucella suis* traitée par l'interféron. V. F. Dima, A. Petrovici, J. Szabados, Th. Vasilesco, A. Pop et K. Rudesco, 721.
Vézina, C.
Transformation of steroids by *Mucor griseo-cyanus*. K. Singh, S. N. Sehgal, and C. Vézina, 1271.
Villanueva, J. R.
Vacuoles of fungal protoplasts. I. Garcia-Acha, F. López-Belmonte, and J. R. Villanueva, 433.
Wainwright, S. D.
On the synthesis of inducible penicillinase enzyme by spheroplasts of *Bacillus cereus*. S. D. Wainwright and E. V. Martin, 334.
Walden, C. C.
Role of *Thiobacillus ferrooxidans* in the oxidation of sulfide minerals. D. W. Duncan, J. Landesman, and C. C. Walden, 397.
Walker, J. L.
The influence of time and media changes on the induction and suppression of β-galactosidase synthesis in *Escherichia coli* B. S. J. Webb and J. L. Walker, 257.
Some observations concerning DNA and β-galactosidase synthesis in *Escherichia coli* B. S. J. Webb, J. Singh Bhorjee, J. L. Walker, and D. A. Rokosh, 377.
Ward, B. Q.
Effects of sulfa drugs on spore germination, vegetative growth, and toxin formation of *Clostridium botulinum* type E. B. Q. Ward and B. J. Carroll, 107.
Production of toxin by *Clostridium botulinum* type E in defined media. B. Q. Ward and B. J. Carroll, 108.
Warner, P.
Prevalence of staphylococcal anti-delta lysin in man. A. C. Maniar, C. Weslake, and P. Warner, 925.
Warren, G. H.
Influence of nafcillin on the enzymic lysis of *Staphylococcus aureus*. G. H. Warren and J. Gray, 321.
Webb, S. J.
The induction of lambda prophages by controlled desiccation. S. J. Webb and M. D. Dumasia, 33.
The influence of growth media on proteins bound to DNA and their possible role in the response of *Escherichia coli* B to ultraviolet light. S. J. Webb, 57.
The effect of 3000–4000 Å light on the synthesis of β-galactosidase and bacteriophages by *Escherichia coli* B. S. J. Webb and J. Singh Bhorjee, 69.
The influence of time and media changes on the induction and suppression of β-galactosidase synthesis in *Escherichia coli* B. S. J. Webb and J. L. Walker, 257.
Bound water, inositol, and the induction of lambda prophages by ultraviolet light. S. J. Webb and M. D. Dumasia, 303.
Some observations concerning DNA and β-galactosidase synthesis in *Escherichia coli* B. S. J. Webb, J. Singh Bhorjee, J. L. Walker, and D. A. Rokosh, 377.
The influence of oxygen and inositol on the survival of semidried microorganisms. S. J. Webb, 733.
Weinberg, E. D.
Role of manganese in biosynthesis of bacitracin. E. D. Weinberg and S. M. Tonnis, 614.

Weinhold, A. R.
Ethanol-induced accumulation of a pentose in *Armillaria mellea*. M. O. Garraway and A. R. Weinhold, 1705.
Wellman, A. M.
Comparison of viability of strains of *Neurospora* after storage in liquid nitrogen. A. M. Wellman, 665.
Wertlake, P. T.
Mycoplasma pseudocolonies from cultures of buffy coat of blood. E. I. Ryschenkow, P. T. Wertlake, and V. M. Young, 1053.
Weslake, C.
Prevalence of staphylococcal anti-delta lysin in man. A. C. Maniar, C. Weslake, and P. Warner, 925.
Westlake, D. W. S.
Metabolism of histidine by *Peptococcus aerogenes*. W. B. McConnell, D. F. Horler, and D. W. S. Westlake, 143.
Westwood, J. C. N.
Plastic chambers for the cultivation of cells on microscope slides and their application in virology. S. A. Sattar and J. C. N. Westwood, 1107.
Immunofluorescence in the study of viruses in tissue culture. I. Development of an immunofluorescent focus assay for herpes simplex virus. S. A. Sattar and J. C. N. Westwood, 1489.
Wetter, L. R.
The role of anaerobiosis in asymbiotic nitrogen fixation. W. A. Rice, E. A. Paul, and L. R. Wetter, 829.
Whitton, B. A.
Studies on the toxicity of polymyxin B to blue-green algae. B. A. Whitton, 987.
Willett, H. P.
Formation of spheroplasts of *Mycobacterium tuberculosis* by lysozyme in combination with certain enzymes of rabbit peritoneal monocytes. H. P. Willett and H. Thacore, 481.
Williams, P. A.
Investigations into the basis of microbial ecology in soil, illustrated with reference to growth of soil diphtheroids and azotobacter in a model system. H. T. Tribe and P. A. Williams, 467.
Williams, P. H.
Effect of nutritional factors on extracellular protease production by *Pseudomonas lachrymans*. N. T. Keen and P. H. Williams, 863.
Williamson, C. K.
Lactic dehydrogenase studies in animals infected with type 12 streptococci or treated with streptococcal nephrotoxin. S. C. Elliott and C. K. Williamson, 1027.
Willis, C. B.
Effect of various carbon sources on growth of *Sclerotinia trifoliorum*. C. B. Willis, 939.
Wilson, R. W.
Control of β-glucosidases in *Schizophyllum commune*. R. W. Wilson and D. J. Niederpruem, 1009.
Cellobiose as a paramorphogen in *Schizophyllum commune*. R. W. Wilson and D. J. Niederpruem, 1663.
Wiseman, G. M.
The nature of staphylococcal beta hemolysin. I. Mode of action. G. M. Wiseman and J. D. Caird, 369.
Antibacterial substances from staphylococci. C. Hsu and G. M. Wiseman, 947.
Wolf, S.
Deoxyribonucleic acid base compositions of fruiting Myxobacterales. H. D. McCurdy and S. Wolf, 1707.
Woodbine, M.
Growth of *Byssochlamys nivea* in various carbon dioxide atmospheres. A. R. Yates, A. Seaman, and M. Woodbine, 1120.
Woodside, E. E.
Biopolymeric associations in bacterial subcellular fractions. E. E. Woodside, C. A. Frick, and C. W. Fishel, 1641.
Woodward, J. M.
The relationship between immune response and hydrolase activity in rat mononuclear leucocytes. F. S. Shults and J. M. Woodward, 795.
Wyss, O.
Differences in toxicity of EDTA + Tris among mating types of *Escherichia coli*. M. C. Goldschmidt, E. P. Goldschmidt, and O. Wyss, 1401.

Yamamoto, T.
The effect of ion concentration and pH on the thermal stability of a canine adenovirus. T. Yamamoto, 1139.
Yates, A. R.
Growth of *Byssochlamys nivea* in various carbon dioxide atmospheres. A. R. Yates, A. Seaman, and M. Woodbine. 1120.
Yotis, W. W.
A comparison of rat and rabbit sera bactericidins active against staphylococci. W. W. Yotis and J. S. Ortiz, 885.
Young, V. M.
Mycoplasma pseudocolonies from cultures of buffy coat of blood. E. I. Ryschenkow, P. T. Wertlake, and V. M. Young, 1053.
Yusef, H. M.
The carbon and nitrogen nutrition of certain fungi. H. M. Yusef and M. E. Allam, 1097.
Zachariah, K.
The structure of phialides in *Penicillium claviforme*. K. Zachariah and P. C. Fitz-James, 249.
Zink, M. W.
Regulation of the "malic" enzyme in *Neurospora crassa*. M. W. Zink, 1211.
Catabolite repression of malic dehydrogenase in *Neurospora crassa*. M. W. Zink, 1296.
ZoBell, C. E.
Some effects of hyperbaric oxygenation on bacteria at increased hydrostatic pressures. C. E. ZoBell and L. L. Hittle, 1311.
Zygmunt, W. A.
Lytic action of lysostaphin on susceptible and resistant strains of *Staphylococcus aureus*. W. A. Zygmunt, H. P. Browder, and P. A. Tavormina, 845.

DATE OF ISSUE

Canadian Journal of Microbiology, Volume 13 (1967), Numbers 1–12.

This date, for each number of Volume 13, will be published in the first issue of Volume 14 (Number 1, January 1968).
